

# Incinerator Training

Incinerator Operator Training will not be offered as a separate course in 2006. Instead, it will be incorporated into the Solid Waste Operator courses.

Incinerator operators will take most of the training provided to other solid waste operators. However, a one hour module on the NH Air and Ash Rules will be added on the second day of training. A separate test for incinerator operators that covers the NH Air and Ash Rules will be given at the same time as the solid waste operator test.

Training on the operation of incinerators and on required pollution control devices is not offered by DES. Each facility "owner" should ensure that their operators are competent to operate the specific equipment as outlined in the facility's permit conditions.

## 2006

# Solid Waste Operator Training and Certification Courses

Course Offerings:

February 1 and 2, 2006

May 15 and 16, 2006

September 12 and 13, 2006

November 15 and 16, 2006

Waste Management Division  
PO Box 95  
Concord, NH 03302-0095

Solid Waste Operator Training and Certification is designed to provide the basics of facility operation and management to new operators. It covers the New Hampshire rules and regulations governing permitted facilities. Specific topics, including used oil, universal and hazardous waste, medical waste, composting, recycling, landfill operation, facility operation, and safety and health are also covered.

The two day course ends with a test on the knowledge gained during the lecture sessions. Every question on this open book test is covered during the sessions and is also found in the handouts for the course. Each operator receives a copy of the training manual and a CD with additional resources.

The CD contains the most current rules and regulations, all of the referenced fact sheets and information on facility operating plans.

The New Hampshire Solid Waste Rules require that all operators at a facility be either certified or in interim status waiting for a certification course.

## Training Agenda

### First Day

- 8-8:30 Registration
- 8:30 Opening Remarks
- 8:45 Types of Waste
